

To whom it may concern,

Packaging materials are manufactured in factories certified according to ISO 9001, ISO 14001 & FSSC 22000 and following good manufacturing practices (GMP).

Based on supplier declarations and representative verification testing performed by an external ISO/IEC 17025-accredited laboratory, we confirm that;

- The sum of concentrations of lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr VI) in the packaging does not exceed the limit of 100 mg/kg, as required by Article 5 of Regulation (EU) 2025/40 (PPWR).
- Lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr VI) compounds are not intentionally added to Pyroll Packaging products.

The customer remains responsible for assessing the suitability of the packaging material for the intended use and applicable regulatory requirements.

We hope that this information will adequately meet your needs and look forward to continuing our service to you. Please feel free to request additional information as needed.

Sincerely,

7.8.2026
